Nice manuscript detailing a seven year experience with teaching pediatric surgery fellows the percutaneous IH repair technique. Huge volume of cases and great experience for each fellow. Several small edits seem warranted:

1. # of surgical procedures do not always add up. 1211 total cases for fellows but mean of case # is 239 for 6 fellows....this does not compute accurately.

2. Were each of the fellows right handed? The text speaks of variation for left and right sided procedures and alludes to some fellows being faster on one side or the other. Please include the handedness for fellows and solo staff surgeon.

3. vas deferens is the correct spelling.

4. Can you include an image or two of the repairs?

Nice paper. Huge experience!
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
