Reviewer’s report

Title: Radiation-induced thoracic necrosis with a pulmonary cutaneous fistula repaired using a free omental flap: A case report

Version: 0 Date: 26 Nov 2018

Reviewer: Ozgur Samancilar

Reviewer's report:

Congratulations for treating such a complex case and as a result of long-lasting effort. I think this case is educational and should be published after minor revisions:

1. The English language needs editing.

2. At the line 97, "different lung ventilation" should be "selective one lung ventilation".

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
