Reviewer’s report

Title: Alveolar soft part sarcoma metastatic to the breast: a case report

Version: 0 Date: 11 Dec 2018

Reviewer: Erin Cordeiro

Reviewer's report:

This is a case report of a rare breast metastases. This is certainly a rare occurrence; however, there are already a few case reports published. The report itself is fairly thorough, although the English does need some revising. In summary, this is a fairly well written case report and its major limitation is merely the fact that it is only a case report of a very rare circumstance with therefore little broad applicability.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
