Reviewer’s report

Title: Rate of Intraoperative Problems during Sacroiliac Screw Removal: Expect the Unexpected

Version: 0 Date: 13 Dec 2018

Reviewer: Ai-Min Wu

Reviewer's report:

This is an interesting paper focus on the Rate of Intraoperative Problems during Sacroiliac Screw Removal, some suggestions from me as following:

1. I hope the authors can add the radiographic images or photos for some cases with complications or problems during the removal in results part.

2. The first and second paragraphs in discussion could be combined together.

3. The limitations of this study better relocated at the end of discussion.

4. I suggest add some potential techniques to decrease the complication in discussion may helpful for other surgeons

5. The conclusion is too long, better to be shorter.

Are the methods appropriate and well described?  
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?  
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
