Reviewer’s report

Title: A rare case of central pancreatectomy for isolated complete pancreatic neck transection trauma

Version: 0 Date: 09 Jun 2019

Reviewer: Ines Gockel

Reviewer's report:

The paper is very interesting and is worth being published in BMC Surgery. However, the English language has to be re-edited prior to acceptance. In addition, the intraoperative figures are not very clear and quality should be improved. Also the descriptions of the figures have to be more detailed. A schematic figure of the reconstruction would be helpful, as well.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
