Reviewer’s report

Title: Retrospective study on the Pattern and outcome of management of sigmoid volvulus at a district hospital in Ethiopia

Version: 0 Date: 02 Apr 2019

Reviewer: Sabri Atamanalp

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

Introduction: This section is too long. There are very much unnecessary knowledge.

Results: This section is too long. There are unnecessary repetitions. Most of the knowledge are present both in the text and in the graphs or tables.

Conclusion: This section is not correlated with the materials and results.

The present paper consists of a retrospective analysis. The authors compare primary anastomosis with stoma and as a result, they suggest avoiding the primary anastomosis in patients with bowel gangrene. As seen, the data of the compared two groups (primary anastomosis and stoma) are not well discussed. An example, the general conditions, which are best evaluated by ASA (American society of Anesthesiologist) score, are not known. To compare these two groups, which have not a statistically compared preoperative data, may not give correct results.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
Please indicate the quality of language in the manuscript:

Needs some language corrections before being published

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?
3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?
4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?
5. Do you have any other financial competing interests?
6. Do you have any non-financial competing interests in relation to this paper?

If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.

I declare that I have no competing interests.
