Title: Early Outcome of Frey’s Procedure for Chronic Pancreatitis: Nepalese Tertiary Center Experience

Version: 0 Date: 29 Jun 2019

Reviewer: Ulrich Friedrich Wellner

Reviewer's report:

the authors present a study of 26 frey procedures for chronic pancreatitis performed in Nepal.

the study is well written using adequate methodology, but is purely descriptive without novel aspects on this topic.

on the other hand, half of the cases were performed for tropical pancreatitis and there is rarely any literature on Frey procedure for this special disease. So I would suggest to change the aim to analyze this issue, and compare tropical to other pancreatitis, in baseline as well as surgical aspects. a review of the current literature could also be amended.
