Reviewer’s report

Title: Systematic review on the needle and suture types for uterine compression sutures: a literature review.

Version: 2 Date: 24 Nov 2019

Reviewer: Sahin Onur Güralp

Reviewer's report:

Dear Editor,

The manuscript is acceptable in its present form.

Just a small aspect to mention for the future reviews and clinical trials is the complications such as uterine necrosis and synechia. The authors may emphasise the necessity of evaluation of the longterm complications with a sentence in discussion in order to strengthen this paper and show where the path should go.

Best Regards

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
