Reviewer’s report

Title: Lethal thrombosis of the iliac artery caused by Aspergillus fumigatus after liver transplantation. Case report and review of the literature.

Version: 2 Date: 13 Oct 2019

Reviewer: Nobuhisa Akamatsu

Reviewer's report:

1. The treatment for AIH before LT should be explained in detail. The dose of steroids, or other specific treatments should be presented.

2. Do authors use prophylactic antifungals after LT as a protocol?

3. How was the steroid dose after LT?

4. Authors mentioned that the patient was on hemodialysis in the early postoperative period. How long was it? What was the cause of acute kidney injury?

5. How were the protocol cultures (nasal, sputum, urine, etc) before LT in this case?

6. Figure 1 is difficult to follow. Antifungal treatments had better be presented in more standing out style.

7. English should be revised.

Are the methods appropriate and well described?
