Reviewer’s report

Title: Absorbable suture can be effectively and safely used to close the mesenteric defect in a Gastric bypass Sprague-Dawley Rat Model

Version: 0 Date: 17 Sep 2019

Reviewer: Mario Musella

Reviewer's report:

Dear Authors, I have read with great interest your article. Your study clearly shows the effectiveness of absorbable sutures for the closure of mesenteric defects during RYGB. The use of a running absorbable braded suture for the Petersen's defect could reduce operative time and technical complexity of the procedure.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
