Reviewer’s report

Title: Comparison of Sequential, Delayed and Simultaneous Resection Strategies for Synchronous Colorectal Liver Metastases

Version: 1 Date: 05 Dec 2019

Reviewer: Reviewer 2

Reviewer's report:

PEER REVIEWER ASSESSMENTS:

OBJECTIVE - Full research articles: is there a clear objective that addresses one or several testable research questions? (Brief or other article types: is there a clear objective?)

Yes - there is a clear objective

DESIGN - Is the current approach (including controls and analysis protocols) appropriate for the objective?

Yes - the approach is appropriate

EXECUTION - Are the experiments and analyses performed with sufficient technical rigor to allow confidence in the results?

Yes - experiments and analyses were performed appropriately

STATISTICS - Is the use of statistics in the manuscript appropriate?

Yes - appropriate statistical analyses have been used in the study

INTERPRETATION - Is the current interpretation/discussion of the results reasonable and not overstated?

No - there are minor issues
OVERALL MANUSCRIPT POTENTIAL - Has the author addressed your concerns sufficiently for you to now recommend the work as a technically sound contribution? If not, can further revisions be made to make the work technically sound?

Probably - with minor revisions

PEER REVIEWER COMMENTS:

GENERAL COMMENTS: The authors did a very good job during the revision of the present study. They extensively performed additional analysis and added important further surgical and clinical information, including complication rates given as the common clavien-dindo classification. Furthermore, the introduction and discussion was significantly altered to convey a more balanced view and conclusions.

I would therefore recommend accepting this manuscript for publication after final minor concerns regarding the discussion, style and data presentation have been overcome.

REQUESTED REVISIONS:

Minor concerns:

1) Please add and discuss the following relevant two references: Reddy et al., (2009) Ann Surg Oncol (PMID: 19506963) and Strowitzki et al. (2017) J Surg Oncol (PMID: 28409832). In particular, the second study has already discussed and analyzed the presented topic (compare Fig. 2). The colleagues could likewise show no survival benefit due to simultaneous resection. This should be mentioned in the present study.

2) Please include data regarding "patients at risk" below the figure graphs for overall and disease free survival.

Are the methods appropriate and well described? If not, please specify what is required in your comments to the authors.

Yes
Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:

Acceptable

Declaration of competing interests
Please complete a declaration of competing interests, considering the following questions:

1. Have you in the past five years received reimbursements, fees, funding, or salary from an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

2. Do you hold any stocks or shares in an organisation that may in any way gain or lose financially from the publication of this manuscript, either now or in the future?

3. Do you hold or are you currently applying for any patents relating to the content of the manuscript?

4. Have you received reimbursements, fees, funding, or salary from an organization that holds or has applied for patents relating to the content of the manuscript?

5. Do you have any other financial competing interests?

6. Do you have any non-financial competing interests in relation to this paper?
If you can answer no to all of the above, write 'I declare that I have no competing interests' below. If your reply is yes to any, please give details below.
