Reviewer's report

Title: Controversies in the treatment of invasive urothelial carcinoma: a case report and review of the literature

Version: 2 Date: 19 August 2014

Reviewer: Giuseppe di Lorenzo

Reviewer's report:

Major concerns:
1. The article doesn't add new informations to the present literature and needs largely to be reduced.
2. Discussion is very long and needs to be reduced.
3. Please add new prognostic nomogram in second line with Time for prior CT (sonpavde et al. Eur urol).
4. Please quote Paclitaxel study by Di Lorenzo (Cancer) et al in second line.
5. CT SCAN is useful to include showing response to chemoterapy.
6. Please add informations if the patient received second line: drug, schedula or nothing.
