Reviewer’s report

Title: Ureteroscopic management of asymptomatic and symptomatic simple parapelvic renal cysts

Version: 2

Date: 22 January 2015

Reviewer: Ahmet Kursad Poyraz

Reviewer’s report:

This is a well organized, concisely written paper dealing with an interesting topic, which can be published in BMC, with some pending revisions.

Minor Essential Revisions

1. Authors should give the results as (mean ± SD) for mean age and mean size

Abstract:

2. Page 2, line 24: change 12 month to 12 months.

Background:

The introduction is comprehensive.

3. The authors should add some information about Holmium laser.

4. Page 3, line 41: change 60.[1] to 60 [1]

5. Page 3, line 52: change ablation[4, 5] to ablation [4, 5]

6. Page 3, line 58: change recently[8-10] to recently [8-10]

Methods:

9. Give the details (name of vendor, wavelength, pulse duration etc) of the Holmium laser system.

10. Please provide some information about laser application (frequency, power, distance between fiber and cyst)

11. Page 5, line 89: Which antibiotics (and dose) were given?

12. Page 5, line 79-80: Are CT and IVU (both) performed to all patients? If so, why?

13. Please clearly describe the exclusion criteria

14. Page 6, line 103: F6 stent or 6F stent?

Results and discussion:
The results and discussion is focused and comprehensive.

References:
The inclusion of references is comprehensive.

Figures:
The images are of high quality.

16. Please edit the manuscript for punctuation.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
