Reviewer's report

**Title:** A new surgical technique for concealed penis using an advanced musculocutaneous scrotal flap

**Version:** 2  **Date:** 30 September 2014

**Reviewer:** John Gearhart

**Reviewer's report:**

1. Major compulsory revisions- needs work on English syntax by native English speaker, also in the discussion the authors should state why all of the patients are so old and why they don’t do this in early childhood.

2. Minor—could be shortened a bit for readability.

**Level of interest:** An article of importance in its field

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
