Reviewer's report

Title: Does visualisation during urethrocystoscopy provide pain relief? Results of an observational study.

Version: 2 Date: 16 October 2014

Reviewer: Alberto Calori

Reviewer's report:

The question posed by the authors is well defined and the methods are appropriate and well described.
The data are sound and the discussion and conclusions appear balanced and supported by the data.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
