Reviewer’s report

**Title:** High pressure balloon dilation for the vesicourethral anastomotic strictures after radical prostatectomy

**Version:** 4  **Date:** 11 March 2015

**Reviewer:** Alessandro Calarco

**Reviewer’s report:**

Minor revisions:

1) When we talk about functional effects after radical prostatectomy, I think it is very important to report data about continence before and after the dilation. You describe just one worsened incontinence after the dilation but it is important to report in the “results” section the pre-dilation continence data.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
