Reviewer’s report

Title: Regulation of urinary bladder function by protein kinase C in physiology and pathophysiology

Version: 0 Date: 13 Aug 2015

Reviewer: Antonio Cicione

Reviewer's report:

This study reviewed the role of protein kinase C (PKC) in micturition cycle both in pathological and normal bladder. Overall, the study is well written. However, few comments and improvements are need about this paper reporting the recent findings on this intracellular signal pathway. Major revision required Please include a brief section on the used methods to review the current evidences about the study outcome. Then, the number of analyzed studies should be reported. Discretionary revision Please consider to include a table summarizing the new roles of PKC on bladder function and its link with bladder disease. This could improve your study and help the reader to have a direct idea on study findings.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
