Title: Positive surgical margins and biochemical recurrence following minimally-invasive radical prostatectomy - An analysis of outcomes from a UK tertiary referral centre

Version: 1 Date: 13 Aug 2017

Reviewer: Warick J. Delprado

Reviewer's report:

The amendments to the article bring it to within the realm of worthy of publication. Whilst some of the issues relating to pathological features at the margins have been addressed largely by inclusion of a statement that these issues could not be assessed, other features have been addressed. As a surgical focused paper, this is now acceptable.
