Reviewer’s report

Title: Evaluation of serum prolidase activity and oxidative stress markers in men with BPH and prostate cancer

Version: 1 Date: 04 Oct 2017

Reviewer: Abdel-Rahmene Azzouzi

Reviewer’s report:

Thank you to have made the changes following my remarks. It is interesting to have divided prostate cancer patients into subgroups according to Gleason scores. The legend of figure no.1 and the box plots are not very clear. Maybe you could modify the presentation of the scale on your graph?

I think we could accept your article for publication after you will make the modification on figure no.1.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
