Reviewer’s report

Title: Risks and complications of transurethral resection of bladder tumors in patients receiving antiplatelet and/or anticoagulant therapy: a retrospective cohort study

Version: 0 Date: 27 Jun 2017

Reviewer: Antonio Luigi Pastore

Reviewer’s report:

This study is on an interesting topic. However the study contains too many limitations to be considerable for its publication. Notably, the retrospective nature of the study increased the risk of patient selection bias. The most important study limitation is the sample size that was too small to compare the results obtained in the group under antiplatlet or anticoagulant therapy (37) versus controls (137).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
