Title: Perineural invasion as an independent predictor of biochemical recurrence in prostate cancer following radical prostatectomy or radiotherapy: a systematic review and meta-analysis

Version: 1 Date: 15 Jan 2018

Reviewer: Tobias Gross

Reviewer's report:

The basis of a systematic review is a comprehensive search strategy. As mentioned in my first comments the hits achieved by the used search strategy is way too low. This is most likely due to the multiple combination of search terms with AND rather than AND/OR.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
