It’s a interesting paper about a hot discussed Topic,

There are some concerns:

1. The limitations are mentionned by the authors themselves

2. why were so many studies excluded?only 11 of 658 were included

3. one of the inclusion criteria was prospective randomized studies. In the discussion you reported that one of the limitations would be that most of the studies were retrospective. Could you explain this?

4. is there any Information about the field of lymphadenectomy?

5. is there a reason why in non muscle invasive cancers a lymphadenectomy was performed?
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
