Reviewer’s report

Title: Triptorelin Relieves Lower Urinary Tract Symptoms in Chinese Advanced Prostate Cancer Patients: a Multicenter, Non-interventional, Prospective Study

Version: 0 Date: 06 Dec 2016

Reviewer: Francesco De Carlo

Reviewer’s report:

The work is quite well covered and of sufficient logic. The Discussions are well documented and argumented. The Conclusions are clear and concise. The figures and the tables provide accurate information about the topic. On the other hand, there are some specific aspects that you can clarify before publication.

Results: unclear information on study population and application of exclusion criteria (see line 230-235 and figure 1)

- how many major protocol violations (120 or 72)?

- what about patients with surgical history? can we consider it a possible bias?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English
Please indicate the quality of language in the manuscript:
