Title: Paroxetine in the treatment of premature ejaculation: a systematic review and meta-analysis

Version: 0 Date: 11 Sep 2018

Reviewer: Bogdan Geavlete

Reviewer’s report:

I would like to congratulate the authors for their work.

First of all, the text seems to be very large.

The title is clear and easy to be individualized on literature research.

The abstract respects the requirements of the journal.

The Introduction is comprehensive and well documented. The aim of the study should be clearly stated in the last paragraph of the chapter.

The Results are well presented. However, the table is too long and difficult to be followed. Discussions are well represented and support the Results. Also, the manuscript includes some phrases about the study limitations.

The Conclusions are clear, concise and reflect the idea of the title.

The manuscript presents a recent bibliography, with a reasonable number of titles.

Language revision is needed.
