Reviewer's report

Title: Treatment of Urinary Calculi After Yang-Monti Ileal Ureter Reconstruction: A Case Report

Version: 1 Date: 09 Sep 2018

Reviewer: Yasser Noureldin

Reviewer's report:

- The title should be modified to "Treatment of Urinary Calculi after Yang-Monti Ileal Ureter Reconstruction: Case Report"

- The key words contain non-mesh terms

- The abstract is poorly written and should be re-written from the beginning. For example the sentence "To explore the safety and effectiveness of ureteroscopy combined with ureteroscopy in the treatment of the ipsilateral lower ureteral calculi and the lower ureteral calculi after Yang-Monti ileum ureteroscopy" is not a complete sentence.

- It is not clear what was the patient complaining of

- In the background section, I think the following sentence "The treatment of such stones is more difficult and less experienced" should be re-written in another way

- The conclusion section should be modified into "It seems like Ureteroscopy combined with laser is a valuable option for management of urinary calculi following Yang-Monti ileal ureteral reconstruction".
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Unable to assess

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
