Title: Intrarenal arteriovenous malformation following flexible ureterorenoscopy and Holmium laser stone fragmentation: Report of a case

Version: 1 Date: 04 Nov 2018

Reviewer: Olivier Traxer

Reviewer's report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

The Authors report an interesting case of MAV following flexible URS, describing its assessment and management. Several points need to be addressed:

1. Please report incidence of AVM following percutaneous nephrolithotomy

2. Report which sources of English literature (e.g. Medline, and so on) were reviewed as stated in the introduction section

3. Language revision is needed

4. How was stone burden in cm calculated? Please report

5. Please detail the used ureteroscope, the diameters of the access sheath

6. Please detail the Hb levels drop

7. Please report follow-up renal function of the patient and how her stone disease was further managed
Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
