Reviewer’s report

Title: A case report of erythroderma in a patient with borderline leprosy on reversal reaction: a result of the exacerbated reaction?

Version: 0 Date: 04 Oct 2017

Reviewer: Maria Teresa Ochoa

Reviewer's report:

The authors were able to address major concerns.

I don't see any Mat and Meth for the staining e.g. fresh vs paraffin tissue, method to count, calculate # cells in skin tissue. Can be part of supplementary material

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
