Reviewer’s report:

Dear Dr. Wilke and co-authors,

I have read the revised manuscript BDER-D-18-00029_R1 and I am very pleased with the changes that you have made. I believe that the manuscript has been substantially improved, especially regarding the inclusion of a flowchart, editing the Methods: Statistical analyses section, adding clarifications to tables if needed, addressing the study design denomination, including data of unexposed patients from before the intervention came into enforcement, and addressing the possibility of selection bias.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
