Reviewer’s report

Title: Diaper dermatitis: a survey of risk factors in Thai children aged under 24 months

Version: 0 Date: 05 Feb 2019

Reviewer: Franz Heppt

Reviewer's report:

A well conducted study with an acceptable size of cohorts.

Statistical methods and the analysis seem to be correct, the discussion as well as the conclusion drawn are appropriate.

Although parts of the study results are similar to the results other authors have been published previously in other parts of the world, it's worth publishing data for the Thai Population.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
