Title: Osteomyelitis complicating secondarily infected atopic eczema: two case reports and a narrative literature review

Version: 1 Date: 27 Nov 2019

Reviewer: Stefanie Ziehfreund

Reviewer's report:

Dear authors,

your manuscript has gained a clear structure and contains the necessary parts adequate for a case report and a literature review now. It clearly has been improved by your extensive revision and is a well-written and interesting article now. However, there are still some linguistic errors which requires revision. Additionally, I still miss a structure in the listed publications within table 1. If there already is a structure (e.g. the publications are listed from the most to the less relevant cases), which I did not recognize, I'm sorry for this comment. Otherwise, I would suggest to structure. Regardless of whether you already have a structure or you now add a structure I recommend to mention it in the caption or the legend (e.g. the reports are listed according to their publication year).

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
