Reviewer’s report

Title: Epidemiology of psoriasis in hard-to-treat body locations: data from the Danish Skin Cohort

Version: 2 Date: 18 Dec 2019

Reviewer: Maximilian Schielein

Reviewer's report:

Thank you for the revision. As we have opposite opinions on whether to adjust for multiple testing or not, I would strongly recommend to add a statistician for further clarification. Anyhow, I want to thank the authors for the open scientific exchange and hope they understand my reasoning. Additionally, if Editor does not agree, I would recommend adding essential information for Benjamini-Hochberg procedure, like chosen False discovery rate, etc. After adding 'mild psoriasis only' to table 2, I would suggest to correct values for n given in the header.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review

Quality of written English
