Reviewer’s report

Title: An abrupt bleeding of the anteriorly-displaced sigmoid sinus: A rare complication of myringoplasty

Version: 0 Date: 25 Aug 2017

Reviewer: Vikas Malik

Reviewer's report:

Thanks for submitting the case report. It is an interesting case report and surely worth publishing.

But the submitted version has a lot of grammatical and language mistakes that need addressing before it can be accepted for publication. Some of the examples are -

Abstract: line 25 - it should read 'quiet' instead of 'quietly'

page 3 - line 64 - sclerotic -edged

page 4 - line 67 could be rewritten as - examination was otherwise normal

page 4 - line 69 - gap and not gab

page 4 - line 72 - write left myringoplasty was scheduled

page 4 - surgical approach - was the bleed noted whilst raising the flap or was the middle ear inspected first? In this case bleed is likely to happen whilst raising the flap before you raise the annulus and get into middle ear -please clarify. Patient was given 10 days antibiotics - is this usual policy? if not then why was it given - please explain.

page 5 - line 90 - says error reference not found??

Even discussion specially where you describe the follow up of the patient can be rewritten

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Unable to assess

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No
Are the conclusions drawn adequately supported by the data shown?  
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?  
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
