Reviewer’s report

Title: A comparison of symptoms and quality of life before and after nasal septoplasty and radiofrequency therapy of the inferior turbinate

Version: 3 Date: 28 Nov 2017

Reviewer: Babak Saedi

Reviewer’s report:

Authors tried to compare nasal obstruction in different patients in a manuscript entitled "A comparison of symptoms and quality of life before and after nasal septoplasty and radiofrequency therapy of the inferior turbinate"

However I could not clearly satisfied with their method. They compared a wide variety of patients with different pathology and different method of treatment whom were treated by different surgeons, which can not support the conclusion.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
