The authors presented a review of odontogenic necrotizing fasciitis from 1987-2018.

1. A total of 58 studies, not 57, were included. Such a simple mistake should not be made. (1.7-63)

2. For the period 1987-2018 104 total papers were identified. But I identify 105 paper.

3. The tables are very simple, not descriptive.

4. this review does not contain any information other than general information. (mortality rate in DM patients)

I must be reject.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
