Title: Epithelial-Myoepithelial Carcinoma: A Population-Based Survival Analysis

Version: 0 Date: 26 Jul 2018

Reviewer: Helen Cocks

Reviewer's report:
This is a nice paper. I only have one thing that I would like to see discussed
Between 1973-2010 there were 246 salivary neoplasms an average of 6.6 /yr
In the next 4 years (2010 - 2014) there are a further 70 SMG and parotid lesions and average of 17.5 /year
Please account for this comparative increase in numbers ( I accept it may be improved accuracy of recording) but some discussion around this is essential in my opinion
