Reviewer's report

Title: Association between lipids profile and thyroid parameters in euthyroid diabetic subjects: A cross-sectional study

Version: 2  Date: 11 September 2014

Reviewer: Jiajun Zhao

Reviewer's report:

Authors have addressed my suggestions adequately. But I wonder how long did it take to recruit the 389 subjects? and the subsequent 73 individuals? It is not easy to persuade one patient to attend the study, even more difficult to select proper subjects according to your strict inclusion and exclusion criteria. In addition, the titles of table 2 and table 3 are not consistent with the contents.

Level of interest: An article of limited interest

Quality of written English: Needs some language corrections before being published

Statistical review: Yes, and I have assessed the statistics in my report.
