Reviewer's report

Title: Clinical course of IgG4-related hypophysitis presenting with focal seizure and relapsing lymphocytic hypophysitis.

Version: 0 Date: 11 Sep 2015

Reviewer: Francesco Ferrau

Reviewer's report:

I strongly suggest extensive proofreading. Page 3, lines 19-24: I would rephrase this part, making clearer the history before and after admission. Page 3, lines 41-42: the authors should clarify why they delayed the pituitary biopsy, and how was the patient after 6 weeks (or more?) of treatment with corticosteroids. Page 4, line 6: what do the authors mean for 'lesional involvement'? Page 4, line 25: what do the authors mean for '.of prednisolone increment'? The sentence should be rephrased. Page 5, line 43: at this point is not clear which 6 cases the authors are talking about.

Are the methods appropriate and well described?
