Title: Diabetes treatment intensification and associated changes in HbA1c and body mass index: a cohort study

Version: 0 Date: 24 Feb 2016

Reviewer: Rajendra Prabhu Guha Pradeepa

Reviewer’s report:

The article is well written, however there are changes which I would like the authors to carry out, before the article can be accepted for publication.

1. The authors have not provided the methods and definitions used to assess the complications mentioned in Table 1. At which point of time were the details of complications obtained?

2. Suggest to split Table 2 as there is too much of information, which would lead to reader's fatigue

3. Suggest to split figure 3 as it is too crowded with tables embedded in it

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
