Reviewer’s report

Title: Plantar pressures are higher in cases with diabetic foot ulcers compared to controls despite a longer stance phase duration

Version: 0 Date: 16 Aug 2016

Reviewer: R. Periyasamy

Reviewer’s report:

1. What is the sensitivity of RS scan

2. Author chosen stance phase duration. Why?

3. Other pressure parameters are already published in other journal paper. Why not consider plantar pressure distribution?

4. Sample size are not matched eg controls subject are less

5. Why author not consider the footwear hardness?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
