Reviewer’s report

Title: The Incidence of Diabetes Mellitus and Diabetic Retinopathy in a population-based cohort study of people age 50 years and over in Nakuru, Kenya

Version: 0 Date: 26 Feb 2017

Reviewer: John Doupis

Reviewer's report:

The authors of this manuscript investigated the incidence of diabetes mellitus and diabetic retinopathy in a population-based cohort study of people age 50 years and over in Nakuru, Kenya. The study has been nicely designed and the methods as well as the statistical analysis is adequate.

The authors need to clarify whether the new diabetes cases diagnosis was determined based only in one capillary blood testing or after a regular plasma glucose measurement. If the diagnosis was based only in capillary blood testing the authors need to mention it as a limitation of the study.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.
Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.
Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.
Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
I am able to assess the statistics
