Reviewer’s report

Title: Patterns, Control and Complications of Diabetes from a Hospital Based Registry established in a Low Income Country

Version: 0 Date: 06 Jan 2017

Reviewer: Laila Sherief

Reviewer's report:

The study is interesting and important to find registry in low income country. It is important to the represents the data of diabetic patients including baseline characteristics of patients and to Monitor this metabolic disease on regular basis and to record the complications.

My comment: It is important to make table for acute complications as well as chronic complications of diabetes. Also to classify the duration of disease on the bases of 5 years eg < 5 yr from 5-10 ….

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
