Title: ADEQUACY OF CONTROL OF CARDIOVASCULAR RISK FACTORS IN AMBULATORY PATIENTS WITH TYPE 2 DIABETES ATTENDING DIABETES OUTPATIENT CLINIC AT A COUNTY HOSPITAL, KENYA

Version: 1 Date: 04 Jul 2017

Reviewer: Sirimon Reutrakul

Reviewer's report:

The revised manuscript is much improved. However, I would like to request a few minor revisions as follow.

1. In the result part, please add the % of patients who had albuminuria and were talking ACE-I or ARB

2. Please add summarized findings from Table 4 in the result section. Currently they are not mentioned at all, and this is one of this important findings.

3. It is not clear what confounders were adjusted for in the multivariate analyses. Did you put all of the factors listed in Table 4 into the equation? If so, please say so.

4. The description under table 4 doesn't make sense. Why do you describe the results under the table? And the numbers do not match with those appear in the table. Please revise.

5. 95% CI of smoking in Table 3 is missing.
