Title: Associations between ERα/β Gene Polymorphisms and Osteoporosis Susceptibility and Bone Mineral Density in Postmenopausal Women: A systematic review and meta-analysis

Version: 1  Date: 29 Nov 2017

Reviewer: Patricia Canto

Reviewer’s report:

Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

This is a new version of the MS ID: BEND-D-17-00137R1. The authors have improved the previous version of the manuscript and answered my questions; however, I think the discussion continues to be very long and messy.

In conclusions, the authors mentioned "ERα/β gene polymorphisms were significantly associated with PMOP risk and BMD in postmenopausal women…." They must to write: … in Caucasian and Asian postmenopausal women, since they only analyzed these ethnic groups.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I recommend additional statistical review
Quality of written English
Please indicate the quality of language in the manuscript:
