Reviewer’s report

Title: Efficacy of combined treatment with pasireotide, pegvisomant and cabergoline in an acromegalic patient resistant to other treatments: a case report.

Version: 0 Date: 25 Sep 2017

Reviewer: Marinela Tzanela

Reviewer’s report:

Dear colleagues

I read your manuscript carefully. My only comment is that the patient described here must take two very expensive drugs for the rest of his life. Do you plan to try any alternative therapeutic modality in the future (2ND SURGERY OR IRRADIATION)? Please add a paragraph in the discussion addressing the health economics issue, as well as the latent effects on glucose metabolism.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
