Title: Hyperglycemia-related central pontine demyelination after a binge-eating attack in a patient with type-2 diabetes: a case report

Version: 1 Date: 30 Jan 2018

Reviewer: Joseph D. Burns

Reviewer's report:

The paper as written is much improved. I disagree with the authors' assessment in the discussion that dysmetria, gait ataxia, and vertigo, even in a hyperammonemic cirrhotic patient, are consistent with hepatic encephalopathy, especially if the mental status was normal.

Are the methods appropriate and well described?
