Neil Gittoes
Editor-in-Chief
BMC Endocrine Disorders

Dear. Neil Gittoes

Thank you for your letter and thoughtful comments concerning our manuscript entitled “Effect of duration of diabetes on bone mineral density: A population study on East Asian males”. We have made minor corrections carefully which we hope meet with your approval.
Sincerely yours,

RESPONSES TO Comments:

1) We note that the current submission contains some textual overlap with other previously published works, in particular:

And

This overlap mainly exists in the methods section.

While we understand that you may wish to express some of the same ideas contained in these publications, please be aware that we cannot condone the use of text from previously published work.

Please re-phrase these sections to minimize overlap and ensure that you cite the works above in your methods section.

Response:

Thank you for your fine comment. We rewrote overlap parts. And we checked this manuscript using duplication program (ithenticate.com). Currently there are no duplications.
2) In your declarations section please amend the “Ethics” heading to be “Ethical approval and consent to participate”. Please also clarify if the need for consent to participate was waived by the named ethics committee.

Response:

We appreciated that your comment. As suggested by the reviewer, we revised that 'Ethics' to ‘Ethical approval and consent to participate’. (Line 4, page 16.)

3) We note that you have still used the term “diabetic men” on page 11, line 11 in the “Discussion” section. Please amend this to be “men with diabetes”.

Response:

Thank you for the comment. We have corrected the term (line 11, page 11).

4) Please amend your “authors’ contribution” section so that all authors’ names are represented as initials. For example, MS Jang would be MSJ and JS Kim would be JSK.

Response:

Thank you for the comment. As suggested by the reviewer, we use the initials of the authors in E-mail section and Authors’ contributions. We revised that ‘Miso Jang’, ‘Hyunkyung Kim’, ‘Shorry Lea’, ‘Sohee Oh’, ‘Jong Seung Kim’ and ‘Bumjo Oh’ to ‘MJ’, ‘HK’, ‘SL’, ‘SO’, ‘JSK’ and ‘BO’, respectively.
5) We would also like to ask for you to provide more justification for the contributions of JSK as currently they do not automatically qualify for authorship. Supervising and validating the study alone does not usually justify authorship.

An 'author' is generally considered to be someone who has made substantive intellectual contributions to a published study. According to the ICMJE guidelines, to qualify as an author one should have:

   a) made substantial contributions to conception and design, or acquisition of data, or analysis and interpretation of data; AND

   b) been involved in drafting the manuscript or revising it critically for important intellectual content; AND

   c) given final approval of the version to be published. Each author should have participated sufficiently in the work to take public responsibility for appropriate portions of the content; AND

   d) agreed to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Anyone listed as an author must be included in this section. If you choose to change your author list you will need to fill out a change in authorship form and send it by email to the Editorial office to be approved by the Editor. The form can be found here: https://www.biomedcentral.com/getpublished/editorial-policies#authorship.

Anyone who contributed towards the article who does not meet the criteria for authorship can be acknowledged in the ‘Acknowledgements’ section.

Response:

Thank you for the comment. JSK also participated in study conceptualization and formal analysis. I am sorry for the confusion. We added Authors’ contributions.
6) Figures should be provided as separate files, and each figure of a manuscript should be submitted as a single file. Figures should only contain the image, as well as any associated key/annotations. If there are legends present within the figure file please remove them. Instead, please provide figure legends under the separate headings of “Figure Legends”. This should be place after the references.

Response:

Thank you for the comment. We added ‘Figure Legends’

7) At this stage, please upload your manuscript as a single, final, clean version that does not contain any tracked changes, comments, highlights, strikethroughs or text in different colours. All relevant tables/figures/additional files should also be clean versions. Figures (and additional files) should remain uploaded as separate files.

Response:

Thank you for the comment. We uploaded the manuscript as a single, final, clean version and separated figure file.
