Please include all comments for the authors in this box rather than uploading your report as an attachment. Please only upload as attachments annotated versions of manuscripts, graphs, supporting materials or other aspects of your report which cannot be included in a text format.

Please overwrite this text when adding your comments to the authors.

To the Authors

This is a well written and well design paper on an important topic. Factors of risk poor glycemic control investigated by regression analysis. There are some paints need to be further clarified.

It is not clear why some factors such as lipids, BP, complications, etc did not included in the models.

Also what was the ratio of BP and lipid control amongst patients with well controlled glycaemia.

The authors stated that they included patients followed in diabetes care centers, however, some of the patients were folioed by the primary care centers.
Reviewer

Are the methods appropriate and well described?

If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?

If not, please specify which controls are required in your comments to the authors.

No

Are the conclusions drawn adequately supported by the data shown?

If not, please explain in your comments to the authors.

No

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?

If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics

Quality of written English

Please indicate the quality of language in the manuscript:
