Reviewer’s report

Title: A CASE OF MALIGNANT INSULINOMA RESPONSIVE TO SOMATOSTATIN ANALOGS TREATMENT

Version: 1 Date: 13 Aug 2018

Reviewer: Marek Bolanowski

Reviewer's report:

Interesting case report of malignant insulinoma treated by using somatostatin analog.

Specific comments:

Tables: The headings of tables are not fully "informative", they should be more detailed. The local reference values of the substances analyzed should be given.

Moreover, Table 1 - given hours are clock hours or test duration hours, this is not clear.

Figures: arrows indicating foci of interest should be given.

References: Too much of "historical and general" references, no specific references regarding cases of insulinoma both malignant and non-malignant treated by somatostatin analogs. There are at least ten case reports...

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes
Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
