Reviewer’s report

Title: A CASE OF MALIGNANT INSULINOMA RESPONSIVE TO SOMATOSTATIN ANALOGS TREATMENT

Version: 2 Date: 29 Oct 2018

Reviewer: Labrini Papanastasiou

Reviewer's report:

The authors have improved significantly their manuscript. Overall, the background, case presentation and discussion sections have been improved with the amendments. However, the first three paragraphs of the discussion section, ie the Wipple's triad description and the causes of hypoglycaemia are extensively presented and could be shorten. There is no need to give emphasis and details on the drugs that cause hypoglycaemia or cortisol deficiency for the purposes of this case report.

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

Yes

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Unable to assess

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.
