Reviewer’s report

Title: Enhancement of postprandial endogenous insulin secretion rather than exogenous insulin injection ameliorated insulin antibody-induced unstable diabetes: a case report

Version: 0 Date: 08 Oct 2018

Reviewer: Giuseppe Defeudis

Reviewer's report:

This case report is interesting and shows an interesting evaluation of the use of insulin treatment. Anyway, there are few comments and suggestions:

- Did you checked any other autoantibodies? Please, explain better the role, and their mechanisms, of autoantibodies during exogenous therapy.

- Which was the time of duration in use of CGM? Please, explain your decision.

- In this CR, how do you explain more episodes of fasting hypo than postprandial?

Are the methods appropriate and well described?
If not, please specify what is required in your comments to the authors.

No

Does the work include the necessary controls?
If not, please specify which controls are required in your comments to the authors.

Yes

Are the conclusions drawn adequately supported by the data shown?
If not, please explain in your comments to the authors.

Yes

Are you able to assess any statistics in the manuscript or would you recommend an additional statistical review?
If an additional statistical review is recommended, please specify what aspects require further assessment in your comments to the editors.

I am able to assess the statistics
